

## Stage 14

GPS: 36° 04.383N ;115° 46.138W

Stage Length: 10.7 Miles

Note: The actual exchange point is moved in from the Highway a few yards so that the follow vehicle does not need to move left, and go out of the shoulder lane at the exchange point. **The “entry chute” needs to be placed so that the “in” runner doesn’t need to drop down an embankment. The entire chute, both IN and OUT, need to fit within the driveway area – the chute may be shorter than usual.**
